

Digital product passports in place

ESPR requires ecodesign requirements and digital product passports for products sold in the EU. We help you structure product information, certify sustainability properties, and connect to QR-code-based product passports.

COMPLIANCE

Workflow tools, datapoints, reports.

ACADEMY

Training, certificates, exam.

What you get

- ✓ Product inventory with material specification
- ✓ Repairability and recyclability scoring
- ✓ QR-code-based product passport auto-generated
- ✓ Life cycle analysis (LCA) support

Use case

A consumer electronics manufacturer uses LexiCompliance ESPR to manage 500 products, generate digital product passports linked to QR codes, and document repairability for each product version.
